

Experiment no-19

19. Create a program for word sense disambiguation using the Lesk algorithm using python.

PROGRAM:

```
[5]
✓ 42s
import nltk
from nltk.wsd import lesk
from nltk.tokenize import word_tokenize

# Download required resources (Run only once)
nltk.download('punkt')
nltk.download('punkt_tab')
nltk.download('wordnet')

sentence = input("Enter a sentence: ")
word = input("Enter the ambiguous word: ")

sense = lesk(word_tokenize(sentence), word)

if sense:
    print("Word Sense :", sense.name())
    print("Definition :", sense.definition())
else:
    print("No suitable sense found.")
```

OUTPUT:

```
*** [nltk_data] Downloading package punkt to /root/nltk_data...
[nltk_data] Package punkt is already up-to-date!
[nltk_data] Downloading package punkt_tab to /root/nltk_data...
[nltk_data] Unzipping tokenizers/punkt_tab.zip.
[nltk_data] Downloading package wordnet to /root/nltk_data...
[nltk_data] Package wordnet is already up-to-date!
Enter a sentence: i deposited money in the bank
Enter the ambiguous word: bank
Word Sense : savings_bank.n.02
Definition : a container (usually with a slot in the top) for keeping money at home
```
