

## Experiment no-24

24. Create a python program that recognizes dialog acts in a given dialog or conversation.

### PROGRAM:

```
15  sentence = input("Enter a sentence: ").lower()

if any(word in sentence for word in ["hello", "hi", "good morning", "good evening"]):
    print("Dialog Act: Greeting")
elif sentence.endswith("?"):
    print("Dialog Act: Question")
elif any(word in sentence for word in ["bye", "goodbye", "see you"]):
    print("Dialog Act: Farewell")
else:
    print("Dialog Act: Statement")
```

### OUTPUT:

```
✓ *** Enter a sentence: Hello, how are you?
    Dialog Act: Greeting
```
